

Utah State Legislature

American Rescue Plan Act

GUIDING PRINCIPLES

American Rescue Plan Act

LEGISLATURE

The Federal Government will send Utah approximately \$1.7 billion. We didn't get where we are as a state by spending indiscriminately; we got here by investing in our future - and we intend to continue that. This is the first phase of allocating funds and more will be done over the next year.

OUR BIGGEST CHALLENGE:

Water

In the decades ahead, water supply, conservation, and infrastructure will be key to managing growth and managing our quality of life.

Housing

Housing availability and affordability are growing concerns and potential threats to our quality of life. High demand coupled with increasing material costs have exacerbated our housing crisis.

OUR BIGGEST OPPORTUNITY:

Technology

Investments in technology infrastructure can impact every sector of our economy including business and financial services, healthcare, and manufacturing and agriculture.

Economic Enhancement

Large-scale projects will give Utah an advantage on competing states and international competition.

Utah State Legislature

American Rescue Plan Act

Based on federal guidance, we will allocate funds to the following:

Public Health
Response &
Remediation

Water
Infrastructure

Revenue Replacement,
Unemployment Solvency,
& Infrastructure

Housing &
Homeless

Emergency
Preparedness

Impacted
Economies

Access to
Justice

Education
Remediation

Networking &
Broadband
